Dear Rantastia,

Over the last few years, we have put a lot of energy into building a strong constituency of members and supporters in countries such as yours where we don't have a formal office. We are delighted to announce that we have **just hit the 1 million mark!** As an International Member of Amnesty International, you bring a variety of perspectives to our movement that are essential to achieving human rights impact together.

Your membership with us means you regularly receive our latest campaign news and ways to get involved. You have access to learning and skills opportunities and you can contribute to innovative digital human rights projects such as Decoders.

As an International Member, you also have a say in the decisions that shape Amnesty's future. The **Global Assembly** is the highest decision-making body of the Amnesty International movement, and International Members are fairly represented.

An important part of being an International Member is adhering to the Code of Conduct. These are the guidelines that all International Members

accepted before joining and should abide by.

Please read the International Membership Code of Conduct here

The next Global Assembly is taking place in a few weeks, and we will be emailing shortly about your representatives, the issues being discussed and the ways that you can use your voice to contribute.

We hope you feel empowered by being a member of Amnesty International. And we look forward to involving you more in shaping our growing and powerful movement.

Many thanks,
Hayley Baker
Membership Manager
Global Supporter Engagement Programme, Amnesty International
